BLOOMFIELD, N. J.

ANSWERS TO CORRESPONDENTS

[Letters addressed to "Correspondents" will receive attention in this column. Inquiries are solicited.]

Q. Was the year 1908 a leap-year?
W. M. C.

A. It was.
Q. On what day of the week did March 15, 1860, occur?
W. A. B.

A. Thursday.
Q. Please give the date of Mrs. William McKinley's death.
R. M. D.

A. May 26, 1907.

Q. What is the technical name of white lead?
O. E. W.

A. It is carbonate of lead.

Q. Where are the United States mints located?
C. C. C.

A. Philadelphia, Denver, San Francisco, Carson City and New Orleans.

Q. Please tell me what days of the week February 15, 1890, and June 28, 1888, came on.
C. J.

A. Saturday and Thursday.

Q. Is there any premium on the half cent of 1834, with the head of Liberty encircled by thirteen stars?
A. M. G.

A. It is valued at five cents, these men and later became a slave trader at earth?

Q. What is the circumference of, and I am

A. At the equator, 24,860 miles. The meridional circumference is 24,857 miles.

Q. Please give a formula for making a crescent solution for fence posts.

A. Crescote oil is used for preserving timber, and it is a distillation of coal tar.

Q. How many rulers reigned from the rise to the fall of the Roman empire?
F. E.

A. Fifty-five, from the time of Augustus, 27 B. C., and including the emperors; six after the division of the empire; seventeen from 395 A. D. to 474 A. D.

Q. Is the word meaning "to stop" spelled "staid" or "stayed"—which is given the preference?
R. J. S.

A. "Staid" is the commonest form. Although derived from stay, the spelling "staid" might better be reserved for use in the sense of sober or sedate.

Q. What became of the land given to Lafayette on his visit to America?
B. L.

A. When Congress voted the Marquis a grant of land, consisting of a township, with an area of 36,000 acres, it left the location of the township to be assigned somewhere among the unappropriated public lands.

Q. (1) Which is the light and which is the dark of the moon? (2) Give the right pronunciation of Senator La Follette's name.

A. (1) The dark of the moon comes on the nights when the moon is near conjunction with the sun and does not shine. (2) Lah fol-let, the accent on the last syllable.

Q. Will you kindly give me the name and address of the manager of the Carnegie Pension Fund for old teachers?
J. M. H.

A. The secretary of the Carnegie Foundation for the Advancement of Teaching, Mr. Clyde Furst, 576 Fifth avenue, New York city, is the proper person to address.

Q. What do the words "Fidel," "Cotulla," "Crux" mean? X. T. D.

A. The first word, in heraldry, expresses fidelity or fealty; the second is a name for a touchstone, a Lydian stone used for testing the purity of gold and silver, and therefore applied in the sense of a standard or criterion; the third word means a cross. All three are from the Latin.

Q. Was General Forrest's name Nathan Bedford or Noble Bedford, and of what State was he a native?
J. H. C.

A. Nathan Bedford Forrest. He was born in Tennessee, went with the Union army to Mississippi when thirteen years of age.

Q. After a ship has been anchored, the anchor loosened and lifted? Under ordinary conditions, the anchor comes up easily when the power, which or hand capstan is employed. The ship is maneuvered in such a way as to relieve a great part of the tension on the anchor chain so that the anchor will let go of the bottom when the chain is hauled in.

Q. Was Porter Charlton, the uxoricide, ever sent back to Italy?
J. B. L.

A. He is in jail in Jersey City, N. J., awaiting a decision by the United States Court on the extradition proceedings brought by the Italian government, the action taking the form of habeas corpus application to release the prisoner. Owing to the crowded condition of the docket it may be two years before Charlton's case is reached by the court.

Q. Referring to the query, "What was the population of the earth at the time of Christ?" and the answer, "It is estimated to have been about 50,000," will you kindly confirm this estimate and give authority for it?
R. W. A.

A. Three ciphers were dropped off of the number in setting up the answer. M. Q. Mathall, the famous British statistician, quotes Bodio as estimating the population of the world at the death of Augustus 14 A. D., to have been 50,000,000.

Q. Please tell me something about

the women's suffrage movement in France, Germany, Australia, Italy and Russia.

Q. R. A. There are suffrage organizations in all the countries named, each one being affiliated with the International Woman Suffrage Alliance. The president of the organization is Mrs. Carrie Chapman Catt, 2 West Eighty-sixth street, New York city, from whom information as to the work of the various societies can be obtained.

Q. Please explain the circle around the moon previous to rain.

F. A. M.

A. It is caused by a cloud, bank of fog or mist. The circle is an optical phenomenon, caused by the rays of light passing around the minute globules of water composing the halo. In the rear of every small object there is a bright spot, instead of a shadow, and the size of the halo or ring depends upon the size of the globules of water, the smaller the globules the larger the halo.

Q. (1) Who was the bachelor President? (2) What is the length, breadth and depth of the Panama canal?
F. E. W.

A. (1) James Buchanan. (2) About fifty miles long from deep water in the Caribbean sea to deep water in the Pacific ocean; forty-one and a half miles from shore to shore. The width of the canal at different points is: From mile 0 to the Caribbean sea to mile 6.70 at the north end of Gatun locks, 500 feet; from the south end of Gatun locks to mile 23.50, 1,000 feet; from mile 23.50 to mile 26.50, 800 feet; from mile 26.50 to mile 27.00, 700 feet; from mile 27.00 to mile 31.25, 500 feet; from mile 31.25 to Pedro Miguel (mile 39.35), 300 feet; from Pedro Miguel through Miraflores locks to deep water in Panama bay, 500 feet. The minimum depth of the canal will be forty-one feet.

Q. Please give a description of the way in which common glass is made.

W. O. B.

A. Ordinary glass has sand as a basis, there being used with it alkalis and alkaline earths, or oxide of lead. The simplest system of making this glass is the old Venetian method, by which the materials are fused in open pots set in circular furnaces, the furnaces having domes. Air is admitted to the furnace by an underground tunnel. Around the furnace there may be as many as eight openings, one or two for feeding the fire and six or seven for working the glass. The dome of the furnace is for the purpose of reverberating the heat downward on the crucible holding the glass. When the materials are thoroughly mixed and melted the glass is ready to be poured, or blown.

Q. In how many countries in the world, and which ones, does the government own and operate of either or both the telephone and telegraph systems exist?
C. E. T.

A. The government control of telegraph and, in most cases, of telephone lines exist in nearly all European countries. Most of these governments combine the postal, telegraph and telephone services under one department, and while the figures are not available, a deficit from the operation of the telegraph lines is admitted. The telegraph branch of the British postoffice has 46,205 miles of lines under its control, and nearly ninety million messages a year are handled, or 2.15 messages per capita. The telegraph lines of the United States amount to 219,938 miles, handling about eighty-five million messages a year, or 1.08 messages per capita. The difference in the number of messages sent over the British and the American lines is due to the very low rates charged in Great Britain. France controls 90,170 miles of wires, Germany 81,303, Austria-Hungary 47,304, Russia 98,570, Italy 26,427, Spain 19,885, Switzerland 5,608, Sweden 5,958, Denmark 2,413, Norway 9,040.

Montclair Academy Notes.

The first baseball game on the schedule was played on Wednesday last. Score: Montclair Academy 8, Mackenzie School 5.

The Orange High School game scheduled for April 30 was postponed on account of the poor condition of the ground.

Warner W. Kent, 12, delivered a very interesting stereopticon lecture on Friday evening, on "Cuba." The after dinner speaker for that evening was Laurence May, 13.

On Friday evening, May 3, Mr. J. C. Meade gave a reading at 8 o'clock in the Assembly Room. His subject was "Julius Caesar."

The special events for May follow: May 3—J. C. Meade, Esq., "Julius Caesar," in Assembly Room at 8 o'clock.

May 3—Tennis with Kingsley School at 3:30 at Montclair Academy.

May 4—Baseball with Bridgeport High School at 2:30, in Montclair Academy.

May 7—Tennis with Barringer High School at 3 o'clock, Montclair Academy.

May 8—Baseball with Mt. Pleasant Academy at 2:30, on Academy Field.

May 10—Junior promenade in the gymnasium.

May 12—Mr. J. S. Halliwell, Bowers Mission. Address in Walden House.

May 13—Tennis with Newark Academy at 3 o'clock at Montclair Academy.

May 15—Baseball with Adelphi Academy on Academy Field at 3 o'clock.

May 17—Final drill and Rostrum Forum debate.

May 18—Tennis with Collegiate School at Montclair at 10 o'clock.

May 18—Baseball with Peckskill Academy at Peckskill at 2:30 o'clock.

May 22—Baseball with Riverside Academy at Montclair at 3:30 o'clock.

May 24—Baseball with Newark Academy at Newark at 3:30 o'clock.

May 25—Tennis with East Orange High School at Montclair at 10 o'clock.

May 26—Address by Mr. Edgar MacNaughten in Walden House.

May 27, 28, 30—Field Day.

May 29—Baseball with East Orange

High School at East Orange at 3:30 o'clock.

NEWARK THEATRES

NEWARK THEATRE

With her colors flying proudly, while her convoying warships boom their last farewell, the historic Maine may be seen making her final plunge into the ocean's depth at the Newark Theatre next week, when Lyman H. Howe will present his exclusive scenes of the most solemn ceremony in the history of the American Navy.

While Mr. Howe has often proven his ability to reproduce historical events with the utmost degree of fidelity, he claims that this reproduction surpasses any he has ever presented. With his customary enterprise he despatched a corps of photographers to Havana—having first secured permission from the government for his photographers to have access to any point of vantage they might select. The scenes are profoundly impressive whether considered as a solemn and historical spectacle or from the human interest standpoint. The series shows all the incidents that occurred just prior to the Maine's last journey into mid-ocean.

PROCTOR'S THEATRE

At Proctor's Park Place Theatre next week, Monday, May 6, the chief personage on a marvelous programme is Ned Wayburn. The gifted Wayburn will present, for the first time in Newark, his spectacular farce in three scenes, "The Producer," which depicts the evolution of a musical comedy and which necessitates the help of fifty artists. Eight big acts surround Mr. Wayburn, chief among whom will be those accomplished Newark vocalists, Horace Wright and Rene Dietrich; another big feature will be the first presentation of the F. F. Proctor Newark Star prize play, which was written by A. M. Jacobs of the Central High School. It is a farce entitled "The New Butler." Others on the bill are Eddie Leonard, the real minstrel man, assisted by Mabel Russell; "A Night in a Turkish Bath"; Harry Green, the male "Eva Tanguay"; El Cota, the master xylophonist; Klutzing's Entertainers, the limit of animal intelligence, and the ever popular motion pictures. The management also announce a big reduction in prices for the spring season, the best seats at matinees being 25 and 50 cents, while the evening performances are 25, 50 and 75 cents—no higher.

GAYETY THEATRE

To miss witnessing "The Winning Widow," the new musical comedy which comes to the Gayety Theatre next week, is to deprive one's self of a real pleasure such as is rarely offered to those who enjoy the very best in theatrical entertainment. The company engaged by Max Spiegel numbers forty people, and includes such musical comedy favorites as Florence Mills, John Hawley, George B. Scanlon. Every song number is full of melody that will haunt you for days after you hear it, chief among the song hits are: "The Light that Lies in Woman's Eyes," "Don't Get Peevish, Pet," "There's Something Awfully Cute About a Soldier," "I Love You," "What Would We Do Without the Moon?" "Why Don't You Come in for a Splash?" etc. May 6—"Queen of Bohemia."

MINER'S THEATRE

Nowhere in all this great world of amusement is there to be found a musical extravaganza organization that can compare with the Moulin Rouge next week's attraction at Miner's Theatre. This company has a decidedly novel method of presenting a program that cannot fail to please the show going public. The specialties are all new and up-to-date, being introduced in the old style way of the Olio between the opening and closing burlettas. A myriad of pretty graceful girls appear in swell gowns which they know how to wear. "The Moulin Rouge" are in for a good week's business and all desirous of witnessing the "treat of the season" should not fail to patronize them. As a special feature the great Asahi and his company will appear in marvelous feats of magic and mystery.

GOLF IN GLEN RIDGE

Only two players turned in their cards in a ball sweepstakes at the Glen Ridge Golf Links Saturday afternoon, which was won by S. M. Greer with 104—22—82, while D. H. Standish was second with 105—19—86.

Escapes An Awful Fate.

A thousand tongues could not express the gratitude of Mrs. J. E. Cox of Joliet, Ill., for her wonderful deliverance from an awful fate. "Typhoid pneumonia had left me with a dreadful cough," she writes. "Sometimes I had such awful coughing spells I thought I would die. I could get no help from doctor's treatment or other medicines till I used Dr. King's New Discovery. But I owe my life to this wonderful remedy, for I scarcely cough at all now. Quick and safe, it's the most reliable of all throat and lung medicines. Every bottle guaranteed. 50c and \$1.00. Trial bottle free at all druggists.—Adv.

Safe Deposit Boxes.

You are invited to call and inspect our Safety Boxes in our Burglar and Fire Proof Vaults. Boxes to rent at \$4.00 per annum. The Bloomfield National Bank.—Adv.

BLOOMFIELD Public Scavenger Service NOTICE!

NOTICE is hereby given that the Scavenger Service Schedule known as the "Summer Schedule" will go into effect on

Monday, May 6, 1912

instead of May 1, 1912, in order to keep the collection of ashes and garbage running smoothly and to avoid any conflicts in the schedule.

For the purpose of insuring a more efficient Scavenger Service the Town has been divided into two districts designated respectively as District No. 1 and District No. 2. The dividing line being as follows: Bloomfield Avenue from the Glen Ridge line to Washington Avenue.

Washington Avenue to Franklin Street.
Franklin Street to Montgomery Avenue.
Montgomery Avenue to the Belleville line.

DISTRICT NO. 1 comprises all the territory north and east of the boundary line (Bloomfield Avenue, Washington Avenue, Franklin Street and Montgomery Avenue.)

DISTRICT NO. 2 comprises all the territory south and west of the boundary line (Bloomfield Avenue, Washington Avenue, Franklin Street, Montgomery Avenue.)

The ashes and garbage will be collected according to the following schedule:

COLLECTION

DISTRICT No. 1.

November 1 to May 4, inclusive.

TUESDAYS—Ashes.

THURSDAYS—Garbage.

SATURDAYS—Ashes.

May 6 to October 31, inclusive.

TUESDAYS—Garbage.

THURSDAYS—Ashes.

TURDAYS—Garbage.

DISTRICT No. 2.

November 1 to May 4, inclusive.

MONDAYS—Ashes.

WEDNESDAYS—Garbage.

FRIDAYS—Ashes.

May 6 to October 31, inclusive.

MONDAYS—Garbage.

WEDNESDAYS—Ashes.

FRIDAYS—Garbage.

Complaints relating to the service may be reported to the Town Clerk's office and will be promptly attended to.

Receptacles must be placed about ten feet inside the front property line when practicable.

The ordinance covering the Scavenger Service must be observed and will be strictly enforced.

By order of

THE TOWN COUNCIL.

A GAS RANGE AND A WATER HEATER.

Just the combination you need in your kitchen for the Summer months.

With a gas range there is no unnecessary heat and no fuel is wasted.

A water heater gives you all the hot water you need without delay or without the necessity of building a fire.

You get better service at lower cost than with a coal range.

We sell ranges and water heaters on easy payment terms. A card will bring our representative to you.

Public Service Gas Co.
